

Alvaro Garcia Linera with Rafael Correa on Ecuador

By Alvaro Garcia Linera

- I. Popular Struggles – Social Cycle of Protest – Ditching Bolivia and Supporting Ecuador – how Sirohi is instrumental in Ecuador and just that from us

In fact the facts are presented as ‘knowing Rafael Correa’ he is definitely up for journalism, and New Left Review with a mix of intellectuals and proof-read Professor Sirohi – which is a Prophetic love for women – in the sense then of a feminist axis in Ecuador for him – which we call freedoms of free love again. Now after knowing Rafael Correa – we argue that a social cycle of popular protest is definitely the basic plan in permanence of revolution then from him ‘knowing Alvaro Garcia Linera’ which is about in fact peasant and working class axis led by the Party – Movimiento Ecuatoriana which then can change to just the institution of the left led by Rafael and I, in fact I have ditched Bolivia for this instrumental Sirohianism.

- II. Long Development Model – against World Bank and towards Marxism, and Cuba, with Modernist architecture as planning the economics and aspects of Ecuador – thanking Sirohi for Trotskyist aspects of culture – from poetry to journalism and history and Marx with Althusser as planned institutes and universities for their children and friends – what we call Communism in the sense of an Actuality of Communism

In fact then how does a determinate negation of crisis in Ecuador complete immanently it develops the a development model which also has architectural modernism and is based on Trotskyist bantering and talking to go back to the old Left and has won the debate – debating is a sharp Sirohian verdict and even essays and genius stuff we are into.

That becomes a complex enough plan for a determinate negation immanently to our conditions of backwardness and dependency.
